

GUARANTEED INVESTMENT PROGRAM

Capital qualified Industry Sectors

Geographic focus: we work primarily in the Americas (including USA, Canada, and South America), Africa, Asia, Europe.

Stage of Project Readiness: Under our Guaranteed Investment Program, projects do NOT need to be shovel-ready.

These are the main renewables-related industry sectors currently qualified for project financing through SanPete's investment programs, when the technology pathway is proven.

Current investor priorities: Minimum \$25M; utility-scale solar/PV, storage, hybrids of these, microgrids, wind power assets, waste-to-energy (pyrolysis/gasification or AD/ biogas), regenerative agriculture, and LED lighting retrofits.

1. Biomass waste-to-value (for electricity, biofuels, biomaterials, CHP, etc.)
2. Concentrated Solar Power (CSP)
3. Energy Efficiency (such as LED lighting retrofits), often in combination with other solutions
4. Fuel Cells (see below for other storage)
5. Geothermal
6. Hydroelectricity (small scale preferred, such as "run of the river"- no reservoirs)
7. Landfill Gas (anaerobic digestion for biogas)
8. MicroGrids — especially for village-level electrification, expanding or extending the electric grid or adding new customers via standalone (baseload) systems
9. MRF – Materials Recovery facilities
10. OTEC – ocean thermal energy conversion
11. Solar Ground Mount (utility-scale)
12. Solar/PV – other
13. Storage Battery (such as Battery Energy Storage Systems or BESS, for grid stabilization)
14. Storage – Compressed Air
15. Storage – Mechanical or Thermal (such as molten salt)
16. Storage – Pumped Hydro
17. Tidal Power, or Wave Power (hydrokinetic)
18. Transmission Line – AC
19. Transmission Line – HVDC
20. Waste Recovery
21. Waste-to-Energy or Waste-to-Value
22. Water Distribution
23. Water Production
24. Water Reclamation
25. Water Treatment
26. Wind Power
27. "Climate Smart" and Regenerative / Sustainable Agriculture/ Forestry

- 28. Agricultural Value Chain — specialty or commodity products, sustainably grown and harvested with positive social and/or environmental impacts
- 29. Buildings/Affordable Housing or other real estate
- 30. Other types of cleantech infrastructure such as Lighting as a Service
