Dun & Bradstreet Business Credit Profile SetUp

We begin with our 6-Step Dun & Bradstreet Business Credit Profile Setup [6-9-month process], each step serves a specific purpose in the business credit and funding process. To achieve credit and funding you must follow each step.

Helping you achieve your financial goals

1. CREDITIBILITY: We establish your business as a viable entity with the major credit bureaus. In order to establish credit, businesses must comply with the corporate guidelines established by the bureaus and financial institutions which include Dun & Bradstreet (D&B), Equifax and Experian.

2. FUNDABILITY: Once compliance is established, an actual business credit file is created. The file establishes a unique profile with D&B and Experian which facilitates the tracking of credit history and the development of a business credit score.

3. BUSINESS CREDIT FILE: Once a credit profile is established, the business will have the opportunity to build a credit history by working with credit and financial institutions who report to D&B.

4. VENDOR CREDIT: We help you get approved for new credit in your business name which ultimately reports to the appropriate business credit reporting agencies. This type of credit can be obtained with no personal credit check, and you will not be required to be a personal guarantor thus eliminating your personal liability.

5. BUSINESS CREDIT: Within the funding platform each retailer lists the products they sell, to which bureau they report and their underwriting requirements. This lets you know who will approve you before applying.

This is how we can guarantee that you will be approved for at least \$50,000 in business credit, this guarantee applies regardless of your personal credit condition. This means you truly cannot lose with our leading business credit building system.

6. FUNDING: Additionally, once you have separated your business and personal liability and secure money without being personally liable for your business debts, you'll soon have one of the strongest assets your business can possess – a powerful business credit profile.

Our 6-Step Dun & Bradstreet Business Credit Profile Setup process makes it much easier to obtain credit and funding in your business name well into the future.
